BASHROCK

Accessibility statement

How we make bashrock.com usable for everyone, what we know still falls short, and how to tell us.

VERSION 1.0 · EFFECTIVE 18 OCTOBER 2026 · ENGLISH

Online version: https://bashrock.com/en/legal/accessibility

Our aim

We want everyone to be able to use bashrock.com, whatever device, browser or assistive technology they rely on. We design and build the site to meet the Web Content Accessibility Guidelines (WCAG) 2.2 at level AA.

What we do

- Every page works with a keyboard alone, with a clearly visible focus indicator and a link that skips straight to the content.
- Text and controls are designed to meet the WCAG contrast requirements in both the light and the dark theme.
- Buttons and links are at least 44 by 44 pixels.
- Pages use real headings, landmarks and labelled form fields, and declare their language.
- Motion is kept to a minimum and switched off when your system asks for reduced motion.
- Layouts adapt to small screens and to text enlarged in the browser.

Known limitations

- The security check that protects our forms needs JavaScript and runs a short calculation in your browser. Without JavaScript the contact form can't be sent; email us at info@karwanstark.se instead.
- The PDF versions of our legal documents aren't tagged for screen readers. Each one has the same text as its web page, which is.
- Most translations were machine-drafted and are still being reviewed by fluent speakers. If something is unclear, the English version is the reference.

Status

We check accessibility as part of building every page, but the site hasn't yet been audited by an independent party. We believe it partially conforms to WCAG 2.2 level AA, with the exceptions above.

Feedback

If something on the site is hard to use, or you need its content in another format, email info@karwanstark.se. We reply as soon as we can, normally within five working days.
